ALBADAR IBRAHIM ALMAYMANI

Makkah, Saudi Arabia | badaribrahim743@gmail.com | +966 533 796 201 | linkedin.com/in/albadaralmaymani

PROFESSIONAL SUMMARY

Data Science graduate with hands-on experience across the full data pipeline — from OCR/PDF extraction and SQL to machine learning and dashboards — who turns raw data into decisions. Built end-to-end data systems and drove key technical decisions on team projects, delivering KPI dashboards that communicate insights to non-technical business stakeholders. A track record of catching data-quality issues others miss.

EDUCATION

Bachelor in Data Science
Umm Al-Qura University — College of Computing
GPA: 3.58 / 4.00 | Graduated: June 2026 | Excellent

CERTIFICATIONS

- Fundamentals of Deep Learning — NVIDIA (2025)

PROFESSIONAL EXPERIENCE

Operations & Planning Analyst — Moasherat Company **May 2026 – Jun 2026**
- Co-built a Python system that automated daily operational planning for **110+ staff across 13+ teams**, cutting a 4–5 hour manual task to ~1 hour.
- Engineered a rule-based assignment engine with automatic de-duplication to optimize allocation and prevent overlapping work.

Data Science Cooperative Trainee — ADALAH IT (QANONIAH) **Mar 2025 – Aug 2025**
- Translated raw subscription and user data into weekly Metabase KPI dashboards, presenting insights to non-technical business stakeholders to support decision-making.
- Identified and resolved data quality issues such as duplicated records and mislinked invoices to ensure accurate reporting.

Seasonal Operations Employee — KSA Hady & Adahi Project **Hajj 2024 & 2025**
- Facilitated sales and organized sacrificial operations under high-pressure conditions during Hajj seasons.
- Collaborated with team members to manage large-scale operations ensuring smooth coordination and execution.

ACADEMIC PROJECTS

Basair — Graduation Project — basairedu.com · 2025
- Drove the data architecture and key technical decisions for a multi-level learning analytics platform — co-developed with a team — serving students, advisors, and department heads.
- Implemented a data pipeline using PDF parsing and OCR to extract, normalize, and store transcript data in a relational schema — processing **67 documents with zero extraction errors** and complete field coverage.
- Built role-based dashboards delivering descriptive, diagnostic, predictive, and prescriptive analytics using OLAP operations grounded in the PERLA framework.

Veterinary Medicines Data Wrangling Project
- Analyzed a large veterinary medicines dataset for regulatory compliance and market trends using Pandas and Matplotlib.

Chest X-Ray Classification — Deep Learning Project
- Built a CNN-based deep learning model to classify chest X-ray images for lung disease detection, designed as a clinical decision-support tool that assists radiologists rather than replacing human diagnosis.
- Implemented the image classification pipeline (preprocessing, model training, and inference) so that new X-ray scans can be automatically analyzed to support faster, more consistent diagnostic review.

SKILLS

Programming: Python, SQL
ML & Data Libraries: Pandas, NumPy, Scikit-Learn
Visualization: Matplotlib, Seaborn, Plotly
Core Skills: Data Wrangling, KPI Dashboards, OCR & PDF Parsing, Relational Schema Design, Dimensionality Reduction (PCA), Regulatory Data Analysis
Tools & Platforms: Metabase, Git, Jupyter Notebook

LANGUAGES

Arabic (Native) · English — Professional Working Proficiency
